

One expired document costs more than **3 years** of FleetGuard.

\$1,168

revenue a truck needs to earn **every day** just to cover its costs. A parked truck earns \$0.

\$29

per month. Flat. Unlimited trucks, drivers and documents.

\$1,168 = 500 miles/day × \$2.336/mile, the 2025 average cost of operating a truck (ATRI). 500 mi/day is our assumption; use your own.

THE WOUND

Trucking runs on margins of **under 1%.**

ATRI reports truckload margins stayed below 1% in 2025. On \$1,168 of daily revenue, that is about **\$12 of profit a day**. One parked day wipes out **about 100 days** of profit.

\$19,246

Maximum fine per non-recordkeeping violation. That is 55 years of FleetGuard.

\$15,846

Maximum fine for recordkeeping violations (\$1,584 per day it continues).

\$0

Earned while the truck sits at the inspection station, and the load is late.

Sources: FMCSA civil penalty amounts, 49 CFR Part 386 App. B, 2025 adjustment (Federal Register 2024-30608). ATRI, Operational Costs of Trucking 2026: \$2.336/mile, margins below 1%. Maximums are the legal ceiling, not the average fine.

Every one of these starts the same way: a date somebody forgot.

THE PART NOBODY TELLS YOU

Your spreadsheet **will not text you.**

Each of these has a date. Each date has a penalty. Which ones can you name right now?

DEADLINE	WHAT HAPPENS IF IT SLIPS
MCS-150 update every 24 months	Penalty up to \$1,000 per day (capped at \$10,000) and your USDOT number can be deactivated.
Form 2290 (HVUT) every year	4.5% of the tax per month late, up to 25%, plus interest.
Insurance (liability) every policy term	A lapse can get your operating authority revoked . No authority, no loads.
Driver license (CDL) renewal cycle set by each state	An expired CDL means the driver cannot legally drive , and the carrier answers for letting them.
Driver medical card every 24 months	The driver cannot legally drive. The truck stops, on a load .
New Entrant audit first 18 months	A failed audit means registration revoked and the carrier placed out of service.

Sources: FMCSA (49 CFR 385.319/.325, 387.7, 391.41); IRS Form 2290 instructions and IRC §6651; trade press on MCS-150 penalties. Confirm current amounts before relying on them.

What you lose **without it.** What you keep **with it.**

10 trucks + 12 drivers → about **76 dated renewals** a year (registration, inspection, 2290, insurance, medical card, CDL, MVR, Clearinghouse, MCS-150...)

If only **1 in 20 slips** (5%) → **about 4 slips a year**

Each slip parks a truck for **2 days** → $2 \times \$1,168 =$ **\$2,336**

$4 \text{ slips} \times \$2,336 =$ **\$9,344 lost a year**

Before any fine, late fee or insurance impact.

FleetGuard costs

\$348 / year

Net saved, a year

≈ \$9,000

About **27×** return. It pays for itself if it prevents **one parked day every 3 years.**

Illustrative model. The 5% slip rate, 2-day downtime and 500 miles/day are assumptions: change them and the ratio still holds. Cost per mile: ATRI 2025. Renewal count assumes standard DOT cycles per truck and driver.

THE FIX

Load it once.

FleetGuard watches every date.

1 • Load your fleet

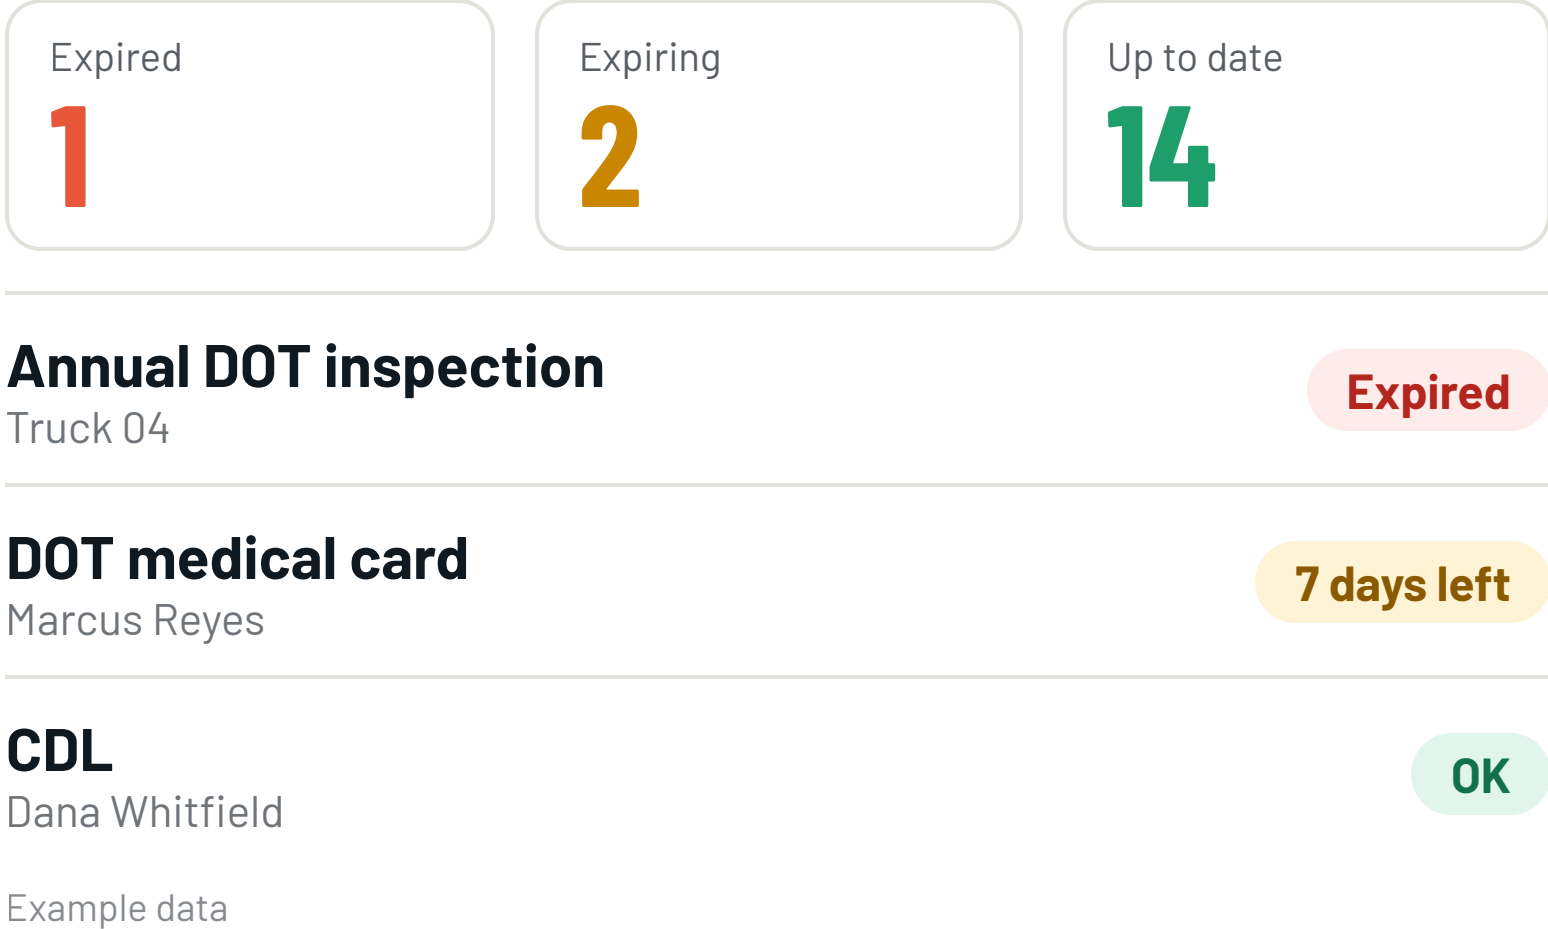

Add trucks and drivers. Pick the document from the DOT quick-start list: expiry fills in automatically.

2 • See it in 5 seconds

One traffic-light dashboard: red, amber, green for the whole fleet.

3 • Get warned in time

Email at **30, 15, 7 and 1 day** before. Renew, update the date, the clock resets.

TRY IT BEFORE YOU TRY IT

The 60-second test.

Without opening a file: **name the next three documents that expire in your fleet, and their dates.** If you hesitated, the risk is already there. It is just waiting for a roadside inspection to show up.

Spreadsheet

Free, until a date slips through a filter, the file lives on one laptop, or the person who keeps it is on vacation. **No alerts.**

Price: \$0

Alerts: none

Setup: build it yourself

Enterprise suite

Powerful, built for 500 trucks: modules, contracts, per-seat fees and training. **Priced out of reach.**

Price: contracts + per-seat fees

Alerts: yes

Setup: modules and training

FleetGuard

Every document, every deadline, automatic alerts. Built for 5 trucks, not 500. **\$29 flat. Free to start.**

Price: \$29 flat

Alerts: 30 / 15 / 7 / 1 days

Setup: DOT quick-start list

START TODAY · NOTHING TO LOSE

Start free.

Never be surprised again.

Free

Up to 3 vehicles and 3 drivers, reminders included. See your first red, amber and green in minutes.

\$29 / month

Unlimited trucks, drivers and documents, plus the AI assistant. One parked day pays for 40 months.

Private install

Your own branded copy, database and domain, for larger fleets, agencies and consultants.
